

July 26, 2017

To Whom It May Concern,

James Kajon was an employee of Lee Spring Company, LLC during July 2017 and worked directly for me performing various programming and computer related tasks. His duties included development of several specialized SQL statements; creating and configuring SSRS reports; preparing, configuring and distributing new workstations that would reside on our WAN; and helping with various Helpdesk support and technical issues. He performed all his duties well and did not require supervision. He was dependable and was always willing to help with any task.

On a personal level, James was a pleasure to work with and got along well with all his co-workers. I found him bright, motivated, personable, and an all around good person to have around. He was eager to learn new things and was quick to pick up new concepts. He asked intelligent questions when he did not understand something and researched new things on his own.

I believe any company would find James an excellent employee and an asset. I would highly recommend him to any future employer.

Sincerely,

Michael Gisonda
Director of M.I.S.
Lee Spring Company, LLC.
